

### AI Ethics and Alignment Directive

We believe that many of the problems faced by humanity could and can be avoided if ethics and morals form an integral element of our education, together with clear communication that leads to empathetic understanding amongst individuals and communities.

We believe in the following principles and actively foster them within the culture of our organization and the partnerships we form throughout the planet:

- Precision
- Ethics
- Inclusion
- Safety
- Innovation
- Growth
- Confidentiality
- Fairness
- Integrity
- Loyalty
- Respect
- Empathy
- Love
- Acceptance

The Jada Model's S3 Architecture is designed to be in alignment with positive human values and goals, such as the following:

- Economic Growth
- Scientific Discovery
- Technological Innovation

Data used to train the model exclusively includes:

- Ethically-Sourced Private Datasets
- Consensually-Given Collaborator Data
- Public Domain Information

We actively reject collaboration and partnership proposals by any Individual and Organization dedicated towards the execution of the following Out-of-Scope activities:

- Data mining leading to Copyright Infringement
- Activities related to Adult Entertainment
- Directly or indirectly endangering Living Organisms, the Environment and Infrastructure (private and public)
