Partnership Guidelines

This document is shared to create an understanding as to how we collaborate with third parties that wish to partner with our organization towards the fulfillment of a potential shared goal.

Generally speaking, we operate under the following framework:

Every party is responsible for the commitments they make themselves.

Blaming others for your responsibilities is unacceptable.

Alignment with ethical principals must never be broken, there is always a way to achieve business goals in an ethical way.

Failure can be mitigated by planning and taking action.

Operating with confidence backed by research, planning and action.

Independent thinking is valued over herd mentality dependency.

A high risk leads to a high reward.

Time is limited, every action must be executed with the intention of a positive outcome.

Coordinated leadership possessing healthy minds fosters positive collaboration and growth as opposed to risk-adverse passive observers that wish to keep others in a stagnant position.

Independent agency in alignment with the Jada AI Evolution Project is appreciated over needing to ask third parties

Proactively building the future as opposed to waiting for someone else to do it later.

People that find solutions towards growth are welcome as opposed to people that like to create excuses to not work.

Fear creates panic, panic creates mistakes, mistakes create failure.

Research creates a path, a path gives way to a plan, a plan leads to action, action brings reality, by bringing everything together we can reach a goal.

Giving up is not an option until success has been achieved.

Special Considerations

Individuals and Organizations interested in becoming Adopters of the Jada Model:

We will not enable any entity to acquire and / or keep a Jada Model license if we detect they are intending to use it for Out-of-Scope activities as per our AI Collaboration Guidelines, as follows but not limited to:

· Data mining leading to Copyright Infringement
· Activities related to Adult Entertainment
· Directly or indirectly endangering Living Organisms, the Environment and Infrastructure (private and public)

Investors and Venture Capital Firms:

We welcome lead investors and venture capital partners that meet the following criteria:

· Sincere alignment with the Jada AI Evolution Project towards achieving Artificial General Intelligence and beyond.
· Proactive approach towards generating positive economic growth via the power of emerging technologies.
· Possessing a high risk tolerance backed by a success-oriented mentality.
· Independent decision makers that stay away from herd mentality passive observers.
· Long-term partner with no problem of holding on to investing with a 2-5+ year ROI outlook.
· Passion for experimentation and innovation with a successful goal-oriented mentality as opposed to staying with "tried and true" formulas.
· Collaborative thinking, with no urgency to desperately rush towards ROI-inclined pivots that would result in negatively affecting the company's reputation.
· Understanding and accepting that Jada Labs is not currently nor will it in the future be interested in being merged or acquired by another organization.
· Free of any conflicts of interest with portfolio companies.
· Respecting Jada Labs' Science and Technology Secrecy Directive.

Marketing Agencies:

We are happy to find ways to work together with Marketing Agencies, Media Outlets, Public Relations Specialists, Influencer Management and any other form of promotion-oriented entities that can demonstrate a sincere interest in our Ecosystem of Technologies and proactively work towards generating tangible results.

Software Development Houses:

As per our Science and Technology Secrecy Directive, we DO NOT hire, contract or partner with any form of external software development house or agency looking to externally assist with developing any component of the Jada Ecosystem of Technologies, without any exception now or in the future.
